Introduction

Envirodata's WeatherMation software has been developed to download, display and respond to the weather data from your weather stations, automatically.

WeatherMation's Core Module, as you see in the WeatherMation LIVE Service, provides users all of your weather data from each of your connected weather stations. This data is on a Webpage to be accessed via the internet on any browser from a computer or mobile device.

Using the System

Go to www.weathermation.net.au

You will see the Login Page – please enter your User Name and Password that were provided to you.

You can click the “Remember Me” checkbox to remember your login details – this will mean in future; you are automatically logged into the system. Please note you will need to have cookies enabled in your browser for this to work.

Click on the Login button to access the system

(If you need to change your password, click on the Reset Password button)

The screenshot shows the WeatherMation Login interface. At the top, there is a blue navigation bar with the title "WeatherMation Login" on the left and a logo on the right that says "WeatherMation Live" with the tagline "WEATHER STATION + INFORMATION + AUTOMATION". Below the navigation bar, there are several menu items: "Live Data", "Historical Data", "Forecast Data", "Tools", "Help", and "Login". The main content area features a login form with two input fields for "User Name" and "Password", a "Remember Me" checkbox, and two buttons: "Login" and "Reset Password". The background of the page is a light blue sky with clouds. In the bottom left corner, there is a logo for "Envirodata WEATHER STATION SPECIALISTS" and some copyright information: "© Envirodata 2014 - 2020 | Disclaimer". A link for "View Mobile Site" is also present.

Menu Options

- **Live Data**
 - **Current Readings** - displays the customized Current Readings from your weather station.
 - **Weather Dashboard** - displays a customizable Weather Dashboard from your weather station. This is ONLY available if you have purchased the Reports Module.
- **Historical Data**
 - **Historical Readings** - displays historical weather data (memory data) from your weather station.
 - **Reports** – This allows you to setup, save and run reports based on your historical data. This is ONLY available if you have bought the Reports Module and if you have Reporting access.
 - **Wind Rose** - This allows you to set up, save and run Wind Rose reports based on your historical data. This is ONLY available if you have bought the Reports Module and if you have Reporting access.
 - **Download Data** – to download your historical weather data as a .csv file.
- **Forecast Data**

- **Help**
 - Core Module, Alerts, Reports and User Maintenance Manuals.

- **Login/Logout** – if you want to change the user.

About/Licensing WeatherMation

The About WeatherMation screen will show you some contact information for Environdata. It displays the software version.

This screen also provides you with your Company Licensing Details. It shows you:

- The Expiry Dates for the Modules that you've purchased
- The Number of Allowed User Licence, how many Active Users you currently have and the Average Number of times they login
- The number of SMS's available for your company, how many SMS's have been used this current month and the Average of SMS's used per month
