Introduction

Envirodata’s WeatherMation software has been developed to download, display and respond to the weather data from your weather stations, automatically.

WeatherMation’s Alerts and Notifications Module provides alerts based on your weather data. Alerts are sent by Email or SMS with settings that include ‘Do Not Contact’ times.

Basic Alerts can be setup using the Website, but for Advanced please contact Envirodata and we can set these up for you.

Using the System

Go to www.weathermation.net.au

You will see the Login Page – please enter your User Name and Password that were provided to you.

You can click the “Remember Me” checkbox to remember your login details – this will mean in future; you are automatically logged into the system. Please note you will need to have cookies enabled in your browser for this to work.

Click on the Login button to access the system

(If you need to change your password, click on the Reset Password button)

2. Basic Alerts Setup

You can setup some Basic Alerts via the Website. E.g. Rainfall more than 10mm since 9am.

Note: For more advanced Alerts, please contact Envirodata and we can set these up for you.

- The User must be LOGGED IN on the WeatherMation Website and have User Administration Access edit or create Basic Alerts. To access the Menu Option: Basic Alerts Setup on the right-hand side under Tools.
- Click on Tools and Basic Alerts Setup.
- At the top there will be a list of all Alerts already created. You can click on it to edit the existing Alert.
